FMUSP Students’ Testimonials

Leonardo Mateus de Lima

“The University of Michigan had a very well prepared team to welcome the foreigners, hence we were gently accommodated and guided regarding our schedules and activities.
I consider very positive the autonomy with the academic formation and the period reserved for international exchange.
As negative side, I think the students has less contact with practical aspects (...)

Thaisa Silveira Barbosa

“At University of Michigan I was extremely well welcomed by everyone, students, physicians, residents and workers.
The positive points were the assistance I have received from the medical students, the attention and care from the exchange staff workers, the respect and the concern with teaching from the professors.”

UofM Students’ Testimonials

Marlon Bohorquez
"Great international office and faculty as everyone was very nice and helpful. And excited to have us. That despite having a national system, there are not enough resources to handle everyone who needs care and that there are many inefficiencies."

Miguel Rovira
"I’ve performed research in the Pediatric Department where I studied the birth cohort in the west region of São Paulo.

The public health system is facing several changes. I’ve learned a lot about the PSF. The strike caused many problems for the hospital.

For the future exchange students, try other services as orthopedics, dermatology and infectology if you have time."
