## 2017 Global Health Symposium: Implementation to Impact – Improving Health at Home and Abroad

FRIDAY, OCTOBER 20, 2017

Henry Ford Hospital • Detroit, MI

We are happy to announce this year's theme: **impact**. The Fourth Annual Symposium will focus on best practices for the implementation of global health projects, as well as the translation of research into public health action and policy change. As always, synergy between global and local health models will be emphasized. Additionally, poster presentations on global health research and programs will be included.

The Symposium is open to all faculty, clinicians, administrators, students, residents, fellows, pharmacists, nurses, and all others interested in global and local health.

### ANNOUNCING OUR KEYNOTE SPEAKER: DR RODRIGO GUERRERO

In 1992, Dr. Rodrigo Guerrero Velasco was elected as Mayor of Cali, Colombia and developed a successful approach to urban violence prevention through the Program DESEPAZ, which has been successfully applied in several cities of Colombia and in other countries. Dr. Guerrero currently works in a non-profit organization devoted to helping peasants in conflict-ridden rural areas. He graduated with his MD from Universidad del Valle, Cali, Colombia and later obtained his MSc and DrPH in Epidemiology from Harvard University.
